The Trans Canada Highway

Hi my name is Samantha, I did my project on the Trans Canada Highway. I chose to do my project because I wanted to learn more about it and I also wanted other people to learn about the Highway that they drive on every day. I learned that the Trans Canada Highway has a big impact on Canada because it helps us transport goods, it helps people go on trips or do business trips and it also helps us get from one side of the country to the other without switching roads which would take way longer.

I got my information from the Internet, library books, other books and a magazine. In my project I have a model that shows the Trans Canada Highway route and what cities and provinces it goes through. I chose to do the model because it shows people better and it's funner to learn in 3D then just on flat paper. I also have a diary that I made of Thomas Wilby who was the first person to do a Trans Canada car trip. Even though the Highway wasn't built back then he was one of the reasons they made the Highway because after him more and more people started going across Canada and they decided it was time to make a Highway. I chose to do a diary because it gives people a better understanding of why they made the Highway.

I hope you enjoyed reading about my project and that by reading this you have a better understanding of my project.
